ABOUT ME

Dedicated software engineer with a strong background in building robust and scalable applications. Skilled in Java, Python, and JavaScript technologies. Experienced with Meta, Amazon, and Google.

WORK

Senior Software Engineer

Google   **2020 - Present, Mountain View, CA**

- Developing machine learning algorithms for search optimization and personalized content recommendations
- Mentoring junior engineers in coding best practices and fostering a culture of continuous learning
- Led performance optimization initiatives resulting in 40% faster response times and enhanced user experience
- Collaborated with product teams to define technical requirements and priorities for new feature development

Software Development Engineer

Amazon   **2017 - 2020, Seattle, WA**

- Designed and implemented microservices architecture to improve system scalability
- Collaborated with product teams to define technical requirements and priorities for new feature development
- Led a team of 5 engineers in project delivery and coordinated sprint planning activities
- Improved system reliability by 30% through automated testing and continuous integration practices
- Contributed to code review process and maintained code quality standards across the team

Software Engineer

Meta   **2015 - 2017, Menlo Park, CA**

- Developed backend systems for social media platform
- Optimized database performance resulting in 20% faster response times
- Collaborated with cross-functional teams to deliver features on schedule and meet project milestones
- Collaborated with product teams to define technical requirements and priorities for new feature development
- Implemented RESTful APIs for external integrations and ensured data security measures

OPEN SOURCE

React.js ↗   ⭐ 224.1k

The library for web and native user interfaces.

Svelte.js ↗   ⭐ 77.1k

Cybernetically enhanced web apps.

Vue.js ↗   ⭐ 45.3k

Vue.js is a progressive, incrementally-adoptable JavaScript framework for building UI on the web.

EDUCATION

University of Washington   Bachelor of Science   2015

SKILLS

Programming Languages

Java, Python, JavaScript

Tools & Technologies

Docker, Kubernetes, Git, MySQL, MongoDB, PostgreSQL
